It cers diagnosed serious illnesses and access must be managed and authorized by Cigna Healthcare in Spain			

Benefits determined in accordance with the criteria of the Spanish Organization of Regional Medical Associations (Organización Médica Colegial, OMC).

Visit the Insured portal to see the Healthcare Centres and Hospitals that have been contracted for your health plan.

(3) Covered at the Centres and/or Specialists contracted by Cigna Healthcare for this benefit and with prior authorization from the Company. Always consult the requirements of the benefit in question.

(6) Always consult the requirements of the benefit in question.

(7) Limited to €6,000 for bilateral prophylactic mastectomy / limited to €3,000 for contralateral prophylactic mastectomy.

(9) 1 course per insured and pregnancy.

(13) Surgery Da Vinci performed with prior authorization from Cigna Healthcare and following payment of €7,000 to the Hospital designated by the Company.

(16) DEFINITION OF SURGICAL PROCESS: A surgical process is the process established after a clinical diagnosis within a surgical treatment plan, which starts on the date of admission to receive such treatment and terminates on the date of hospital discharge. It includes all expenses required to perform it: hospital stays, whether in a room and/or an ICU, day hospital, sitting room, operating room, recovery room, material, medication, instrumentation, prosthesis and implants, diagnosis tests, therapeutic acts and fees of all healthcare professionals and specialists involved in the process during the hospital stay.

(17) Surgery robotics performed with prior authorization from Cigna Healthcare and following payment of €1,200 to the Hospital designated by the Company.

New coverages 2026

In order to keep offering you the best service, we are including a series of benefits to continue providing you with the best healthcare.

At Cigna Healthcare we keep incorporating medical advances that make the difference. We extend our covers with innovative tests and treatments that allow more accurate diagnoses, less invasive interventions and more effective solutions that improve the quality of life of our clients and members.

Pre-eclampsia screening test

We incorporate this advanced diagnostic test that allows early detection of the risk of developing pre-eclampsia, a serious pregnancy complication characterized by hypertension. It is performed during the first trimester of pregnancy and significantly improves prevention and clinical management, reducing risks for mother and baby. This cover includes one test per pregnancy.

POEM technique for achalasia

We offer coverage for this state-of-the-art, minimally invasive endoscopic technique that has become a reference option for the treatment of achalasia, an oesophageal disorder that makes swallowing difficult. POEM technique allows faster recovery, less discomfort and excellent clinical results.

Intravascular lithotripsy (IVL)

This innovative hemodynamic technique is applied in cases of severely calcified coronary arteries. It uses acoustic pressure waves (shock waves) to fracture calcium and facilitate the implantation of stents, improving revascularization and reducing cardiovascular risk. It is especially useful in concentric/eccentric calcifications and chronic occlusions in high-risk patients.

Percutaneous pulmonary thrombectomy

We add coverage for this minimally invasive procedure that removes thrombi in the pulmonary arteries. It is applied in severe cases of pulmonary thromboembolism and significantly improves the restoration of pulmonary flow, with lower risk of bleeding and greater clinical efficacy.

Microspheres for vascular embolization

These small devices are used to block blood vessels selectively in critical situations, such as acute bleeding representing a life-threatening emergency and in embolization and chemoembolization in liver cancer processes, offering a less invasive and safer alternative.

Auditory ossicular prosthesis in otosclerosis

We include the cost of the prosthesis required in the surgery for otosclerosis, a pathology that affects the chain of bones of the middle ear (hammer, anvil and stirrup). This device allows the restoration of hearing ability and significantly improves the quality of life of those experiencing hearing loss due to this pathology.

New coverages 2026

In order to keep offering you the best service, we are including a series of benefits to continue providing you with the best healthcare.

Clinical psychology from family medicine

We extend the medical specialties that may prescribe clinical psychology sessions, now including family medicine and/or general medicine. This way, we facilitate access to mental health care, improving early detection and follow-up from the primary care level.

Musculoskeletal lithotripsy: extension of sessions

We increased to five the number of sessions covered for this non-invasive treatment indicated in musculoskeletal ailments such as tendonitis (with or without calcification), calcaneal spur, plantar fasciitis or pseudoarthrosis. An effective technique that helps relieve pain and accelerate functional recovery.

Historical new coverages included

2020-2025

2025

- **Non-Oncological PET-CT:** We are expanding coverage for PET-CT with the radiopharmaceutical I8-FDG within the cardiology specialty, specifically for the evaluation of myocardial viability in patients with severe left ventricular dysfunction who are candidates for revascularization.
- **Oncology:** Coverage now includes up to 15 sessions of hyperbaric oxygen therapy for oncology patients with delayed radiation-induced injuries (affecting soft tissue and/or resulting in bone necrosis). This addition promotes tissue regeneration in irradiated areas, reduces local inflammation, and alleviates pain.
- **Gynecology:** We are introducing a non-invasive prenatal screening test (one per pregnancy) to offer a safe and advanced method for detecting chromosomal abnormalities in chromosomes 13, 18, 21, X, and Y.

2024

- In **ear prosthetics:** we have extended our coverage of prosthetics and implants to include the prostheses required for cholesteatoma surgery.
- In digestive: **radiofrequency in Barret's oesophagus.** Less invasive technique than conventional surgery.
- In oncology: administration of **intrathecal, intravesical and intraperitoneal chemotherapy**, making it possible to focus the treatment by being able to administer the medication inside the affected cavity.
- In cardiology: **coronary angiography by TAC:** includes one test per insured person and annuity.

2023

- In **Urology:** prostate enucleation with laser in benign prostatic hyperplasia. Expansion of Da Vinci robotic surgery for kidney cancer.
- In **Prosthetics:** expansion of biological materials in the specialties of traumatology and neurosurgery.
- In **Digestive:** endoscopic capsule for the diagnosis of digestive hemorrhage and/or intestinal bleeding of unknown and occult origin and Crohn's disease.
- In **Otorhinolaryngology:** intraoperative monitoring in acoustic neuroma surgery (orl).
- In **Gynecology:** placement and removal of subcutaneous contraceptive.

2022

- In **Oncology:** 360° Breast Surgical Oncology, Contralateral breast symmetrisation and Meshes in breast reconstructions. Da Vinci Robotic prostatectomy..
- In **Cardiology:** percutaneous occlusion device. Coronary CT. Subcutaneous Holter.
- In **Psychology:** we have expanded the number of psychology sessions to IO under the expense reimbursement mode.
- In **Physiotherapy:** shock waves.
- In **Travel assistance - new Travel Abroad Assistance guarantees:** return ticket for one family member if the insured person is hospitalised. Accommodation and living expenses for that family member. Expenses if the stay is extended by medical recommendation including hotel and living expenses. Cash advance abroad due to extraordinary medical expenses.

2021

- In **Urology:** all health plans are expanded to include prostate fusion biopsy and DA Vinci robotic surgery to treat prostate cancer.
- In **Oncology:** two new genomic platforms for breast cancer (mammaprint and prosigna). We have also expanded cover to include two new radioactive tracers (PET-DOPA and PET-Methionine), and access to pronto therapy for Premium plans.
- In **Gynaecology:** Factor II Prothrombin and Factor V Leiden tests. Reinforcement of remote medical care services: new electronic prescription service and video consultation with the medical network.

2020

- In **Oncology:** expansion of coverage indications for BRCA genetic determinations I and 2.
- In **diagnostic testing:** inclusion of tests with PET – RMN hybrid imaging technology.
- In **cardiology:** cardiac rehabilitation following coronary heart surgery and acute myocardial infarction.
- In **prosthetics and implants:** Vascular coil prosthetic for embolization processes and expansion of coverage to all biological ligament plants from the bank bone in knee surgery.
- **Psychological assistance in day centres** for eating disorders.

* Benefit available exclusively under Reimbursement plans.

** Benefit available only under specific Reimbursement plan options.
